TUM IDP | 16 ECTS | AI Startup
Interdisciplinary Project @ Blona

Blona

Join us in building the AI copilot for European Manufacturers.

We are working with leading hidden champions & are supported by leading institutions.
Join a young & ambitious team from Meta, Amazon, ETH, Imperial, TUM, University of Waterloo.

DATE	**Semesterbreak / SS24 / WS24**
LOCATION	**Remote / Berlin**
TOPICS	**Full-Stack (React, TS) / Cloud / NLP / Generative AI (RAG)**

YOUR OPPORTUNITY

As part of your IDP, you'll have a unique opportunity to become a key part of our tech team. You will have an active part in i) co-defining the product roadmap, ii) owning one special product feature stream, and thus iii) profiting from a steep learning curve with us from day 1. You will shape the entire infrastructure, from front- to backend to the ML side of things.

YOUR PROFILE

- You have either one of (both is a plus)
    - –> full-stack experience building tech products (Typescript is a plus)
    - –> experience with ML technologies (ideally with NLP or Generative Models)
- Experience leading your own projects or building your products is a plus.

BE PART OF THE BLONA TEAM

- Charlotte (CTO - ex Meta, ETH, Imperial, BCG, Goldman Sachs)
- Sebastian (CEO - ex Amazon, 2x Founder, TUM, LMU, Columbia)
- Anna (ML / Software Engineer - University of Waterloo)
- Christina (ML / Software Engineer - TU Berlin)
- Jakob (ML Engineer - TUM, ETH)
- Korbinian (Infrastructure - TUM, Motius, prev. founder)

OUR TECH STACK

Google Cloud / Vercel / Next.js / PostgreSQL / Prisma (ORM)
