

Who we are

[droov](#) aims to provide UberEats-level technology to restaurants worldwide. Our self-service solution allows small eateries to create their own branded stores and set up pickup and delivery operations in mere minutes, making them independent and competitive as larger chains

About IDP

- We support and guide all organisational matters of the IDP
- This module is supervised by the TUM Entrepreneurship Research Institute (ERI)
- The work schedule can be agreed with each IDP team member individually
- Flexibility in terms of working hours (hybrid: remote + occasional meetings)
- You can apply alone or as a team

1. Web App Development (React.js)

2. React Native Development

3. iOS development
