PROJECT STUDY

Ecco Collection

IDP @ ECCO COLLECTION

3-6 Months
Team of 2-4 students
As soon as possible

Your Profile:

- **Team size:** 2-4 motivated students
- **Your Qualifications:** Students (m/f/d) in the field of computer science or a related degree program (>4 semesters).
- **Technical Skills**: Knowledge in API integrations, software development, infrastructure setup, and proficiency with software development tools and platforms.
- **Entrepreneurial Mindset:** You're driven to create change and show an extensive hands-on mentality
- **Self-Driven:** You work independently and take full ownership of your project delivery
- **Language Skills:** Fluent in both English and German.

Your Project:

- **Strategic IT Support:** Assist in critical IT project, providing valuable analysis and contributing to key decision.
- **Project Ownership:** Take responsibility for software development tasks, working with a prestigious external IT provider to develop innovative software solution.
- **Collaboration with Experts**: Work closely with the founders and the external IT team to support high-level technical initiatives, ensuring smooth project execution.
- **IT Process Improvement:** Help optimize IT workflows and contribute to the efficiency of the overall tech infrastructure.

Your Benefits:

- **Work with Experts:** Gain hands-on experience while collaborating with state-of-the-art experienced professionals.
- **Professional Growth:** Develop valuable skills in IT in an innovative, high-performance environment, accelerating your career trajectory.
- **Networking Opportunities:** Build strong connections in the IT and startup industries, enhancing your professional network for future opportunities.

For our innovative, dynamic start-up focused on developing a groundbreaking software solution in the HOTEL INDUSTRY we need YOUR help!
